Customer Reference Letter

October 30, 2002

Mr. Drew Blackstone, CEO
Apexx Equipment, Inc.
14 Inverness Drive East, Suite C-124 Englewood, CO 80112

Dear Mr. Blackstone:

This letter is in reference to my recent purchase of your Apexx Lift and Transport Table. You have made a very durable and professional appearing table that would be a welcome addition to any veterinary clinic. This table is very mobile

and easy to use when transporting ill or injured animals. Also, the table is completely quiet and runs so smooth that the animals hardly know they are being lifted. They actually seem to enjoy it. We have not had a problem with any animals accepting the table and all of our clients have been equally impressed with it and our clinic's added concern for the health and welfare of their pets. Thanks again for making my work easier, more enjoyable, and adding to our clinic's logo as "THE CLINIC THAT CARES!"

Sincerely,

D.B. Hutchins, MS, DVM, CM

*** Note from president of apexx:**

Dr. Hutchins was so pleased with his first Apexx Lift and Transport Table that he ordered a second table (stationary model) for his procedure/exam room.
